

Omnitracs Intelligent Vehicle Gateway™ (IVG)

Grow your business with an intelligent, ELD-compliant telematics solution

Omnitracs Intelligent Vehicle Gateway™ (IVG) is a next generation telematics solution designed to support Omnitrac's suite of best-in-class applications.

Stay efficient, compliant, and competitive

Whether it's completing massive amounts of paperwork, staying compliant with the latest regulations, or retaining drivers, the challenges of running a profitable logistics company are endless. Fleets constantly look for ways to do more with less while staying compliant with the latest regulations. IVG supports a suite of applications that help fleets do both.

Applications running on IVG help fleets stay compliant, increase efficiency, reduce costs, improve customer service, and reduce regulatory fines.

Increase driver safety and productivity with a device that is built to last

Drivers are more productive and satisfied with IVG's easy-to-use interface and Wi-Fi and terrestrial web browsing. IVG's Intelligent Voice Interface (IVI) enables hands-free access to key information and intuitive message notifications reduce distractions, increasing driver safety and productivity.

IVG is built to last, with an industrial-grade processor and 1024 x 600 resolution resistive touchscreen display. It exists seamlessly within fleets already using Omnitrac technology and installation is easy and complete in less than 30 minutes.

Intelligent Vehicle Gateway:

- Easy-to-Use – Large, intuitive touchscreen interface
- Powerful – Use more applications for longer with better processing speed
- Secure – Hard-wired with a ruggedized shell for maximum reliability
- Hands-Free – Voice command with Intelligent Vehicle Interface (IVI)
- Flexible – Multiple hardware, connection, and integration options

While the IVG represents the latest in telematics hardware, our robust suite of applications is what really allows you to take your business to the next level:

Hours of Service (HOS)

By fully automating driver logs, operational inefficiencies and risks associated with inaccurate paper logs are reduced. This application is fully compliant with the current HOS regulations in the U.S. and Canada.

Fault Monitoring

Provides near real-time alerts for common fault codes and includes important diagnostic information. These alerts enable fleets to proactively diagnose issues and take action to reduce fleet maintenance and repair costs.

Vehicle Inspection Report (VIR)

Eliminates paper inspections and makes it easier for drivers to complete accurate vehicle and trailer inspection reports. Managers and drivers can access stored reports at any time and are alerted immediately to any DVIRs with unresolved defects.

Omnitracs Weigh Station Bypass, Provided by Drivewyze Preclear

Drivers can bypass Drivewyze-supported weigh stations and inspection sites up to 98 percent of the time. It helps fleets save time and money — and increase driver productivity and retention.

Omnitracs Navigation

Always current and responsive, this application provides best-in-class truck routing, customized maps, and high-speed software updates. It provides an optimized, driver-friendly user interface with visual and spoken turn-by-turn directions and real-time speed alerts.

Trailer Tracks

Provides near real-time data on tractor/trailer location and status in the U.S., Canada, and Mexico. Sensors can detect cargo, and when doors open and close. Fleets can plan more efficiently, increase productivity, and improve security.

Driver Workflow

An intuitive mobile tool that allows drivers to accept load assignments, view trip information, and complete tasks with near real-time communication directly to the office. Drivers can complete their forms and checklists electronically and automatically.

Media Manager

Fleets can cost-effectively deliver detailed information to remote drivers and help them stay connected. Additionally, fleets can manage the content to ensure files and documentation are up to date.

Critical Event Reporting (CER)

Monitors vehicles for critical, safety-related events in near real time to help improve driver behavior, maximize fleet operations, and prevent accidents.

About Omnitracs, LLC

Omnitracs, LLC is a global pioneer of trucking solutions for all business models. Omnitracs' more than 1,000 employees deliver software-as-a-service-based solutions to help more than 12,000 customers manage nearly 1,100,000 assets in more than 70 countries. The company pioneered the use of commercial vehicle telematics thirty years ago and serves today as a powerhouse of innovative, intuitive technologies. Omnitracs transforms the transportation industry through technology and insight, featuring best-in-class solutions for compliance, safety and security, productivity, telematics and tracking, transportation management (TMS), planning and delivery, data and analytics, and professional services.
