

# Omnitracs Roadnet Anywhere Routing + Dispatching

## Beverage Distribution Industry Solutions

Grow your business while remaining customer-centric and profitable with Omnitracs' powerful routing and dispatching technology.

### Ensuring Customers are Properly Served

Nowadays, beverage retailers are demanding more and more from their distributors. Not only do they need their orders to be fresh and intact, but they also require their deliveries to be on time in order to properly satisfy their end consumers. In today's competitive environment, it is crucial to be able to track the progress of drivers and merchandisers as well as provide consistency to customers by committing to delivery times and service windows. Omnitracs Roadnet Anywhere can help you manage these demands. With it you can:

- Gain real-time visibility and answer "Where's my truck?" calls in seconds
- Know immediately when an order has been delivered
- Adjust routes based on customer-preferred service windows
- Reference delivery service histories to predict customer wants and needs

### Creating Well-Balanced Route Plans

Consumer beverage tastes are in a constant state of flux, making it important to accommodate new orders without necessarily adding more vehicles and drivers — or the time it takes to complete each route. Omnitracs gives you the tools you need to create the most efficient and accurate routes possible. With them, you can:

- Create routes that adhere to customer, vehicle, and business constraints
- Know the precise impact of each move from the route scoreboard
- Check that route plans adhere to commercial road restrictions
- Make daily routing fast and easy with route pass templates
- Ensure accurate delivery locations by cross referencing satellite views with an interactive geocoding feature
- Account for pre- and post-trip time, breaks, waits, and layovers

### Agility and Speed That Goes Down Easy

Always plan for the unplanned — delivery service windows could move, quantities may change, or a customer might cancel an order. As a distributor, you must be quick and agile to stay competitive. Our dispatching technology can help you:

- Locate your vehicles and drivers in real time
- Manage last-minute or manual orders with our powerful 'suggest route' algorithm
- Edit delivery sequences with easy drag and drop functionality
- Incorporate pickups into routes in real time

### Showcase Easily Consumable Data

Even when we take the time to plan out every last detail, the plan will fall apart if no one can be held accountable. By using Roadnet Anywhere Routing and Dispatching, you can compare the plan to what really happened on the road. With our reporting capabilities, you can:

- Identify trouble delivery spots and driver variances with actual vs. planned reporting
- Coach drivers that run extra miles and make unplanned stops — using real data
- Monitor undesirable driver behavior such as speeding, stopping too long, or being out of contact with the office

Omnitracs' powerful routing + dispatching solutions can help your fleet be more efficient, profitable, and customer-centric. Learn more at [www.omnitracs.com/solutions/planning-delivery](http://www.omnitracs.com/solutions/planning-delivery).
