7 things you can do with an upgrade to Omnitrac's One

Solera |  Omnitrac's

Your company must keep up with evolving customer expectations to stay competitive. Stay in the race by upgrading from the Omnitrac's Roadnet Transportation Suite (RTS) to planning, routing, and dispatching solutions that connect to the industry's only complete, end-to-end fleet management platform — Omnitrac's One.

Here are 7 things you can do to benefit your customers after upgrading:

1

Future-proof your operations

- Leverage an advanced, user-friendly, cloud-based solution for automatic updates
- Fuel growth with highly-configurable solutions that scale and adapt to your unique business needs
- Seamlessly integrate with other Omnitrac's cloud-based solutions and expand service offerings
- Autonomously solve issues when routing and dispatching by leveraging genetic AI and machine learning
- Easily customize specific geocodes to ensure delivery location accuracy as you add new customers

2

Put drivers first

- Identify and coach drivers while reducing risk
- Keep assets safe on the road with accurate, turn-by-turn commercial navigation
- Enable drivers to focus on the road by eliminating manual forms
- Offer an easy-to-use workflow interface that shows specific tasks for specific stop types
- Improve communications with two-way messaging between drivers and the back office

3

Control costs and remain compliant

- Avoid the costs that come with on-premises software, such as implementation fees, maintenance overhead, etc.
- Ensure you are always operating within the law as applications automatically update with current regulations
- View vital information about your orders, routes, workers, and equipment to answer costly “Where’s my order?” calls in seconds
- Compare planned vs. actual route data to highlight areas of improvement

4

Gain insight into events happening on the road

- View up-to-date equipment location and performance anytime, anywhere with mobile access
- Integrate, monitor, and measure routes and orders with complete, end-to-end visibility
- Monitor the progress of multiple routes at once
- View all vehicle location and status information from one screen
- Quickly view stop lists, exception notifications, and other route details
- Keep a real-time view of roads with automatic, scheduled map upgrades

5

Boost operations with smart data

- Automatically analyze and optimize your distribution, service, and sales operations based on historical data
- Eliminate manual re-routing and improve accuracy with Omnitrac's Strategic Planner
- Continuously view fuel economy, engine run or idle time, and diagnostic trouble codes
- Analyze fleet performance, driver trends, and business analytics through easy-to-read dashboards
- Employ the routing methodology that's right for your business — from standard to dynamic, and everything in between
- View live and historical stop details using planned and actual data

6

Route smarter, not harder

- Enable multiple users to work within the same session at the same time
- Automatically send scheduled reports to individuals or groups within your organization
- Quickly review planned routes and test scenarios for each
- Access all Omnitrac's solutions through single sign on
- Ensure an easy transition with robust online training videos and materials, which are available 24x7
- Leverage a user-friendly, configurable interface that gives dispatchers full fleet visibility
- Automatically save your work and easily import and export .XLS and .CSV files

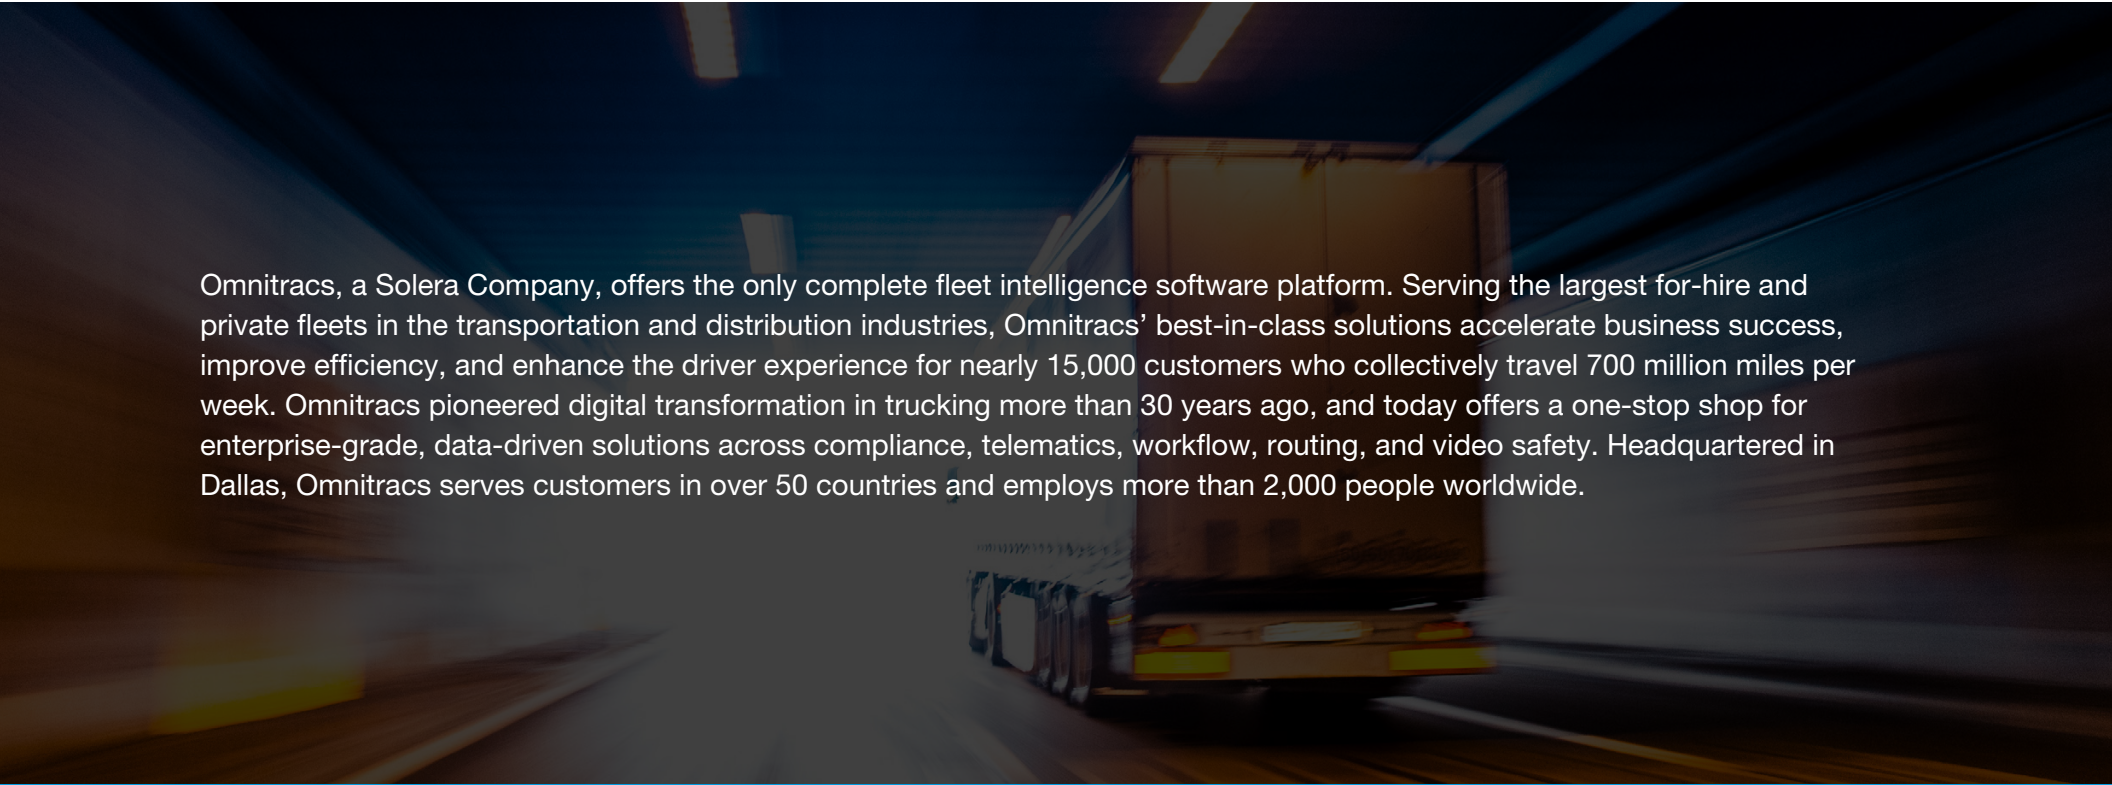

7

Enhance your customer's experience

- **Enable contactless delivery**
- **Send alerts to customers upon arrival and when a delivery is scheduled or rescheduled**
- **Personalize service through proactive notifications that can include proof of delivery photos from your in-field teams**
- **Let customers view the status and locations of their deliveries online**
- **Discover how customers really feel by offering the ability to easily rate service**
